Urban Morphology and Design

Editors: Stephen Marshall, University College London and Olgu Çalışkan, TU Delft and Middle East Technical University, Ankara

Built Environment

Volume 37, number 4, December 2011

In this issue, the editors and their contributors explore ways of better linking urban morphology and design not only theoretically, but also how this understanding can be applied to urban design and planning practice, and so lead to better place making. They address questions such as: how can a stronger approach to physical form be (re)established in relation to spatial planning, through better morphological understanding? How can the morphological way of thinking about the urban fabric – including its spatial context and temporal dynamic – be used to influence acts of design? And on which methodological and conceptual bases can we construct a morphology-led planning and design approach in urbanism?

CONTENTS

Urban Morphology and Design: Introduction
OLGU ÇALIŞKAN and STEPHEN MARSHALL

Morphological Investigations: Cutting into the Substance of Urban Form
KARL KROPF

A Joint Framework for Urban Morphology and Design
STEPHEN MARSHALL and OLGU ÇALIŞKAN

Morphological Design Control for Large-Scale City Development: A New Proposal
TONY HALL and PAUL SANDERS

Towards the Conceptualization of Piecemeal Urban Transformation: The Case of Mersin, Turkey
TOLGA ÜNLÜ

Metropolitan Landscape Morphology
PETER BOSSELMANN

A City is Not a Rhinoceros: On the Aims and Opportunities of Morphogenetic Urban Design
MICHAEL W. MEHAFFY

Publication Reviews

Edited by Professor Sir Peter Hall and Professor David Banister, Built Environment is published four times a year, both print and online. For more information or to order a copy of this issue contact:
